

Welcome Aboard!

Through exploring the events of the Titanic, the children will look at what life was like aboard the Titanic, the history of the Titanic and also analyse how the passengers felt. They will capture the atmosphere of the sinking of the Titanic by evaluating Jim McDonald's art work and investigating different pastel techniques. They will create a postcard, a menu and a fact file all about the Titanic and it's sinking. At the end of the project, they will plan and organise an exhibition displaying their work.

English: Children will write postcards from the viewpoint of a passenger. They will explore what passengers ate and create a Titanic inspired menu. Lastly, the children will use all of their knowledge about the Titanic to produce a detailed fact file.

Science: The children will explore different materials and their properties and conduct an experiment to test which materials are the most waterproof.

Music: Exploration of Pitch and Texture. The children will be creating a Stomp-style soundscape of the Titanic's shipyard by using their bodies as percussive instruments.

Art: The children will explore the artist Jim McDonald and create their own sketches and watercolour pictures based on his work.

Geography: The children will name and locate the countries and capital cities of the United Kingdom and explore the oceans using an atlas and globe.

History: The children will investigate what happened to the Titanic and how it sank. They will learn about the different classes on the Titanic and compare what the journey was like for different passengers.

Outcome: We will plan and organise a Titanic exhibition and perform a dance from Titanic, learnt during their Movin Monkees sessions. The outcome will be on Wednesday 21st October at 2:30pm.
